INSTRUCTIONS FOR USE

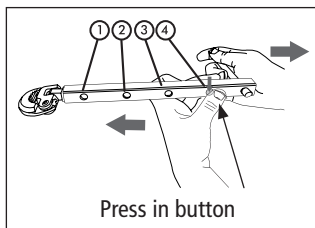

1. Position jaw at desired angle to access the nut. The jaw rotates 180° for ease of use.

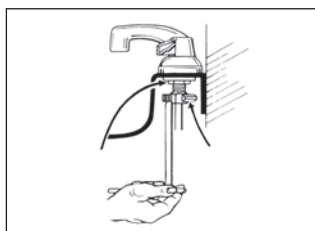

2. Place nut inside the jaw, and turn clockwise to tighten. To loosen, turn anti-clockwise.

3. To adjust the length of the arm of the telescopic basin wrench, push in the button, whilst pulling away from the wrench to one of the other locking positions.

4. Tighten or loosen nut to suit the application.

HANDY HINT

For long life, lubricate all moving parts with FIX-A-TAP waterproof lubricant (Product #217271) and store carefully when not in use.

It is recommended to wear protective eye glasses when using this tool.
